EDUCATION

The Chinese University of Hong Kong, Hong Kong SAR   Aug.2025 – Now

Ph.D Student. in Computer Science and Engineering

- U.S. News 2024 Global Computer Science Rankings: 7

- Research Topic: Quantum Compilers.

Institute of Computing Technology, Chinese Academy of Sciences, China   Sep.2021 – Jun.2024

M.S. in Computer System and Architecture

- U.S. News 2024 Global Computer Science Rankings: 13

- GPA: 91.34 / 100, Rank: 2 / 344 (Top 1%)

- Research Topic: LLM for Compilers for Software Engineering.

Beijing University of Posts and Telecommunications, China   Sep.2017 – Jun.2021

B.S. in Computer Science and Technology

- U.S. News 2024 Global Computer Science Rankings: 46

- GPA: 91.29 / 100, Rank: 10 / 383 (Top 3%)

- Research Topic: Automatic Generation of Compiler Backends.

PROJECTS

I have led some projects on leveraging LLMs for compiler construction, focusing on both infrastructures and methodologies, resulting in some top-tier publications and additional papers currently under review (**UR**).

Domain-Specific LLM Infrastructures for Compiler Backend Development.

- A data processing framework for generating backend code data for different compiler infrastructures [UR].

- An open-source, large-scale, and comprehensive compiler backend code dataset, ComBack(++) [1,4].

- Two open-source LLMs tailored for compiler backend development tasks, BePilot-1.5B and 7B [1].

Automated Compiler Backend Generation and Testing Methodologies.

- A compiler backend auto-generation method based on template synthesis and feature selection [2].

- A RAG method for compiler backend generation that incorporates graph representation learning [UR].

- A prediction approach for compiler backend correctness without running regression tests [UR].

Generalizability to Various System Software.

- A study on generalizing the proposed methodologies to different types of system software [3].

I have also participated in several compiler-related projects, such as LLMs for compiler optimization [5], recognition of compiler optimization options [6], and rule-based compiler constructions [7].

AWARDS

- **[1]** **National Scholarship** *(Annual Rank 1st in the department of CS in BUPT)*   Oct. 2020
- **[2]** First Class Academic Scholarship in Chinese Academy of Sciences   Sep. 2022
- **[3]** Distinguished Bachelor Thesis in Beijing   *(Top 1% in Beijing)*   Dec. 2021
- **[4]** 2nd Prize in National English Competition for College Students   Oct. 2020
- **[5]** Honorable Mention Prize in The 2020 Interdisciplinary Contest in Modeling   May. 2020

WORKING EXPERIENCE

Institute of Computing Technology, Chinese Academy of Sciences, China   Sep.2024 – May.2025
Research Assistant in AI for SE / Compiler.
